* not recommended for inline binding and spool (only carpet forming and C-Press)

Options

- Standalone version for high speed manufacturing of double wire spools
- Inline version for high speed double wire binding lines
- Single or double rewind for formed double wire

The double wire forming machine P44-96 is the most sold and approved double wire forming machine in the world. Based on its strong and solid design the machine is the ideal solution for long lasting high speed inline or standalone production runs.

Diameter and pitch can be changed quickly to avoid unnecessary downtimes.

All common diameters and pitches can be manufactured in absolutely high and constant quality.
