

Knife Outboard Cylinder Stiffener

Upgrade

Upgrade Applications

Applicable to Model III DDCO knives and Model II DDCO knives with brushless cylinder motors.

Upgrade Description

Provides improved cut-off cylinder retainers that increase the effective cylinder stiffness and reduce cylinder vibration.

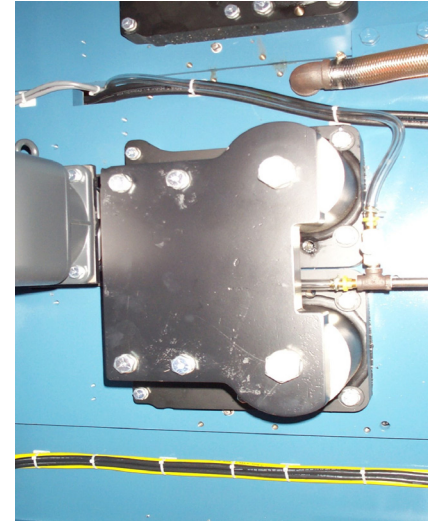

Upgrade Benefits

- Increased blade life
- Decreased tune frequency
- Improved cut quality

Installation Requirements

As the difficulty range is rated as difficult, installation by a MarquipWard-United field service technician is recommended.

The customer is responsible for providing a fork lift with boom or crane capable of lifting 2,000 lbs.
