# WinDECC

Upgrade

Upgrade Application

For all MarquipWardUnited DECC machines

Upgrade Description

Replace existing obsolete AB VME/PLC 5 controllers with modern ControlLogix hardware and upgrading the outdated DOS-based Operator Interface Computer to a Windows-Based computer and graphical interface.

Upgrade Benefits

- Improved reliability by replacing all VME PLC's with a single ConrtolLogix PLC

- Remote access capability provided by Ethernet WOIC interface

- Improved Windows-Based Operator Interface

- Visual display of order information including output level, sheet width, board type, and more!

- Shortcut buttons to frequently used status screens

- Configurable Hot Keys

- Slide-out menus provide easy access to any desired status or configuration screens

- Windows looks and feels more familiar and easier to navigate than DOS controls

- Easy configuration access, modification, and verification

VortX for starch and mixing kitchens
